DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5-7, 9-11, 14, 16-20, 22-24, 26-29 and 31-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Mueller et al.

Mueller et al disclose apparatus and method for removing contaminants from process streams in metal recovery processes in which a reservoir is adapted to receive a solution containing metal ions at a selected concentration. An anode and cathode are disposed in a reservoir and the anode and cathode are operative to establish an electric potential difference there between. A filter is operative to retain a first portion of the solution having a first concentration of metal ions and to remove a second portion of the solution having a second concentration of metal ions lower than the first concentration. A filter (e.g., nanofilter) is shown in a circuit to return a portion of the solution to the "reservoir". See col. 5, lines 59-67; col. 6, lines 1-60; col. 7, lines 1-67; col. 8, lines 1-50; and col. 9, lines 1-67. See Figures.

The reference refers to "retenate" and "permeate", col. 10, lines 15-23.

Allowable Subject Matter

3. Claims 4, 8, 12-13, 15, 21, 25, 30, and 33-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:
The references of record don't show or suggest an electrowinning cell system with a filter in fluid communication with the system, said system having a valve disposed between a solution holding tank and a filter collection tank and said system including a concentration sensor in the solution holding tank.
